Radioline Makes Radio Available For All Android Developers

Dublin, IRELAND & Paris, FRANCE – November 6, 2014 -- Radioline, a leading radio aggregator in Europe, announces that Android developers will now be able to implement Internet radio in all of their applications.

For the first time worldwide, this announcement from Radioline marks the very first radio aggregator on the market that will allow Android developers to include radio as part of their content.
"Radio listening on mobile devices is increasing at a very fast pace, and mobile users are more and more demanding when it comes to content. It needs to be fast, and easily accessible. Radioline's new support of Android applications will significantly expand radio listening to users around the globe" said Geoffroy Robin, **Radioline**'s Managing Director and Co-Founder.

Aggregating enriched content of over 35,000 news, talk, sports, musical radio stations & podcasts from more than 130 countries, **Radioline** allows millions of users to find and listen to their favorite radio stations & podcasts online based on personalized recommendations, moods, and editorial selections.

Available in its next Android release in December, **Radioline** has already completed an implementation with partner Gentle Alarm. "Internet radio has been requested by users countless times over", said Martin Hunke, creator of **Gentle Alarm**, a popular alarm application for Android that will soon be updated in the Google Play Store to allow its users to wake up every morning with their favorite radio show. "Adding **Radioline**'s content to it will be a huge improvement for those users expanding the pie of choices for them 10 fold."

If you are an Android developer and want to include radio as part of your content, contact Radioline at contact@radioline.co and visit www.radioline.co/4dev
