

Press Release

Paris, France – For Release on December 8th, 2014 at 09.00 AM CET

Radioline makes LeWeb'14 available live on the radio

Paris, FRANCE – December 8th 2014 – Radioline, a leading radio aggregator in Europe, has been chosen as a dedicated partner by the international conference LeWeb, to offer a live broadcast of the event on its service, with a dedicated LeWeb'14 radio station.

LeWeb is THE international digital innovation conference. Every year, it gathers thousands of guests and speakers worldwide. The event can be followed on YouTube and this new edition LeWeb'14 will also allow listening to all the main speakers interviews live on the radio.

Radioline will make the official LeWeb'14 radio station available on its service on the 9th, 10th and 11th of December 2014, and will therefore allow all smartphones, tablets and laptops owners to listen to all the conferences broadcasted live from the International Stage.

For all the people who can't attend this new LeWeb edition, but also for all the visitors onsite, the LeWeb'14 radio station will be another way for them to stay connected to the event « *Digital radio is growing at a very fast pace, and is now being listened to in any situation. We're delighted to allow all the persons interested by LeWeb to now listen to it live on the radio* » says Geoffroy Robin, Radioline's Co-Founder & Managing Director.

Radioline will also be present onsite and will animate a *LeWeb'14 Backstage radio station*. This station will interview all the visitors during this three days event and will be made available on Radioline's YouTube channel.

Radioline aggregates more than 35,000 News, Sports, Talk, Music radio stations and podcasts worldwide, and will launch a brand new version of its service for the end of the year celebrations.

About Radioline

Radioline, a leading radio aggregator in Europe, allows radio listeners to find their favorites shows & tracks in a catalogue of 35,000 radio and podcasts from more than 130 countries. The service is built on a highly-scalable, socially interactive cloud-based technology platform and enables high-fidelity content streaming, massive channel aggregation, intelligent recommendation, advanced management, and universal access via any mobile device, online PC, connected TVs and in-car digital solutions.
